

VALORISE
MASS VALUATION SYSTEM

The 'VALORISE' Advantage

- Valuation Best Practice Compliant
- Stage 1-4 analysis & reporting
- Automated 'Report of General Valuation'
- Search direct from property data view
- 'PowerGrid' mass data view/edits
- Supplementary valuations
- Objection case management
- Customisable lookups and modeling
- Maps overlay
- Upload attachments to property
- True off-line capability (optional)

VALORISE by Advance Computing is the leader in Municipal Property Valuation software with in-field and back office efficiencies.

Developed in conjunction with valuation professionals, Valorise combines mobile capability, on-line and off-line content and powerful Business Intelligence modeling and reporting, meaning you can satisfy your clients requirements anywhere in the country, anytime.

Extensive Reporting: Valuation Best Practice compliant Stage 1-5 reporting, General Valuation reports.

Powerful searching: Filter properties from any field using in field or full text searching.

Property at your fingertips: View, change and calculate valuations in one screen or edit multiple properties and values at once.

Flexible modeling: Use a range of valuation methods and calculations.

Off-line capability: The reality is field inspections are sometimes completed outside of mobile coverage. Take the full functionality of Valorise on the road.

With full statistical analysis, Valuation Best Practice and Data Responsibility Compliance, Valorise offers the next level in flexibility and customisation to suit your needs, without the need for add-ons or plug-ins.

The 'PowerGrid' view allows the filtering and update of mass data, saving hours of data entry and validation, combined with MS Excel integration to meet customised internal reporting.

Automated production of Stage 'Reports of General Valuations' eases the task of data analysis and commentary. Valorise allows your focus to remain on revenue generating activities, while ensuring auditability and compliance obligations are maintained by the software.

Backed by Advance Computing, Valorise offers unparalleled flexibility and integration giving you peace of mind your investment is secure and forward compatible with government or legislative requirements.
